Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention generally relates to electronic communication of encoded video data, and more particularly to a system and method of recovering video data between wireless devices.

The prior art of record in combination or alone fails to teach or suggest these elements of the independent claims 1, 10, 15, and 20 in combination with other elements. For example independent claim 1 has claim limitation such as signal analysis system for analyzing the return signal to determine if a degraded signal condition exists between the transmitter and wireless device, and a recovery system that converts a predictive video frame in the encoded video data into an intra-coded video frame if the degraded condition exists. Claim 10 has claim limitations such as a system for analyzing a return signal from wireless device to determine if a degraded signal condition exists between the base station and wireless device, and a system that converts a predictive video frame in the encoded video data into an intra-coded video frame if the degraded signal condition exists. Independent claims 15 and 20 have similar claim limitations. For the above reasons independent claims 1, 10, 15, 20, and their dependent claims 2-9, 11-14, 16-19, 21-23, are allowable.

2. Claims 1-23 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
